In all intersecting alley(s) herein specified at the street lines of said specified street(s) the surface of the finished pavement adjoining the curbing shall be even with the top of the curbing and the surface of the finished pavement at the center of the roadways of said alley(s) shall be three (3) inches below the top of the curbing; and a transverse section of the surface of the finished pavement at the street lines of said specified street(s) shall be an arc of a circle passing through the surface of the pavement adjoining said curbing and the surface of the pavement at the center of said finished roadway(s), the surface of the said pavement thence shall slope gradually to meet the surface of the finished pavement at the curb line of said specified street(s).

On the sub-grade as formed and compacted shall be spread an insulation course of limestone screenings. Said insulation course shall be one (1) inch in thickness and shall extend across the full width of the roadbed.

On the insulation course as formed and compacted shall be spread a foundation course consisting of a layer of crushed limestone of the best quality, broken so as to pass through a ring of four (4) inches internal diameter and held on a ring of two (2) inches internal diameter. The stone spread shall be well graded as to sizes. It shall be evenly distributed so as to leave no pockets filled with the small size stone. This layer shall be thoroughly rolled with a self propelled three wheel roller, weighing not less than ten (10) tons. The rolling shall begin at the edge of the pavement and the roller shall move parallel with the center line of the roadway. The roller shall progress gradually towards the center of the roadway, uniformly lapping each proceeding track, covering the entire surface with the rear wheels and continuing until the stone does not creep or move ahead of the roller. After the crushed limestone has been thoroughly rolled and keyed, limestone screenings shall be applied gradually over the surface and the rolling continued until sufficient screenings have been applied to completely fill the interstices. The screenings shall be swept in with hand brooms to properly fill the voids. The spreading and rolling shall continue until no more screenings will go in dry. No excess of screenings shall be used before applying water. Immediately after the voids have been filled with screenings, the macadam shall be sprinkled until saturated, the sprinkler being followed by a roller. More screenings shall be added if necessary. The sprinkling, sweeping and rolling shall continue until a grout shall be formed of the screening and water that will fill all voids, and form a wave of grout before the wheels of the roller. The quantity of screening and water necessary to fill the voids shall be determined by the engineer and shall be sufficient to produce a

rough, granular surface. The rolling, at all times, shall begin at the sides, and then progress toward the center, thoroughly covering the entire surface with the rear wheels. When compacted, this layer shall measure not less than five (5) inches in thickness.

Upon the finished waterbound macadam base there shall be uniformly applied by an approved type of spreader box, two (2) inch stone to a depth providing a total base course thickness of three (3) inches after final compaction. After shaping to grade and rolling with a ten (10) ton roller three quarter (¾) inch stone chips shall be broadcast and broomed into the surface voids at the rate of fifteen (15) pounds per square yard. Liquid asphalt at a temperature of 140 degrees F. shall be uniformly applied by a pressure distributor at a rate of one and one-half (1½) per gallons per square yard. Stone chips shall again be broadcast and broomed uniformly over the surface at the rate of fifteen (15) pounds per square yard. Liquid asphalt shall be uniformly applied by a pressure distributor at the rate of one-half (½) gallon per square yard. Stone chips shall be broadcast again at the rate of ten (10) pounds per square yard. The surface shall then be thoroughly rolled. The asphalt shall conform to the State Specification for Emulsified Asphalt R. S. 2, Page 640 of Illinois Standard Specifications for Road and Bridge Construction adopted January 2, 1952.

On the said foundation course shall be placed an asphaltic concrete surface course two (2) inches in thickness consisting of an asphaltic concrete mixture conforming to the standard requirements of the Illinois State Division of Highways for Type 1-11 Asphaltic Concrete adopted January 2, 1952, as follows: The asphaltic mix shall consist of a mineral aggregate bonded with the asphaltic cement. The mineral aggregate shall consist of the best quality of crushed gravel or crushed stone in sizes graduated in accordance with the following table, viz:

Passing No. 10 retained on No. 40 sieve	5- 18%
Passing No. 40 retained on No. 50 sieve	7- 22%
Passing No. 80 retained on No. 200 sieve	5- 13%
Passing No. 200 sieve	4- 8%
Bitumen	5- 7%

(Table 45.11 p. 247 State Specifications)

The asphaltic cement shall conform with the standard requirements of the Illinois State Division of Highways for Grade P.A. 6 Paving Asphalt, adopted January 2, 1952. It shall have a flash point (Cleveland open cup) 500 plus Fahrenheit. It shall have penetration at seventy-seven (77) degrees Fahrenheit of seventy-five (75) to eighty-five (85), and at least ninety-nine and five-tenths (99.5) per cent of bitumen shall be soluble in carbon disulphide.

When fifty (50) grams of said paving asphalt is heated in an uncovered tin box five and one-half (5½) centimeters in diameter and three and one-half (3½) centimeters in depth, and is held at a temperature of three hundred and twenty-five (325) degrees Fahrenheit for five (5) hours, then it shall have lost not over two (2) per cent by weight and the penetration of the residue thus obtained shall not be less than seventy (70) per cent of the penetration before such heating. Said penetration being determined as herein described. Said paving asphalt shall have a ductility of not less than one hundred (100) centimeters being determined by elongating a briquette Dow form of said paving asphalt at uniform rate of five (5) centimeters per minute at a temperature of seventy-seven (77) degrees Fahrenheit.

The paving asphalt and mineral aggregate shall be mixed when heated between three hundred (300) and three hundred fifty (350) degrees Fahrenheit in an approved mixer to produce a homogenous mixture in which all particles of aggregate are coated uniformly. The heated mixture shall be delivered to the pavement in trucks with approved clean tight dump bodies. The temperature when delivered at the street shall be between two hundred fifty (250) and three hundred fifty (350) degrees Fahrenheit. Upon arrival the asphaltic mixture shall be spread upon the prepared base at a uniform depth and consistency so that the thickness when compacted as herein described will be two (2) inches.

Immediately after the asphalt surface course shall be spread it shall be compacted thoroughly and uniformly with a three (3) wheel roller or a tandem roller. The asphalt paving mix shall be dumped first upon approved steel dump pans outside of the area on which it is to be spread. Immediately thereafter it shall be distributed into place with shovels and spread with rakes in layers of uniform density and correct depth, unless a spreading machine is used. If a spreading machine is used it shall be of a type approved by the Board of Local Improvements. Immediately after the surface course mixture is placed it shall be compacted thoroughly with a three-wheel roller or a tandem roller. One (1) or more three-wheel rollers and one (1) or more tandem rollers will be required. The actual number of such rollers to be determined by the Engineer in accordance with the progress of the work. If the production of the asphalt plant delivered to the pavement exceeds seventy-five (75) tons per hour additional rollers shall be furnished as directed by said Engineer. After a final rolling the asphalt surface course shall at all points have a density of not less than ninety-five (95) per cent of the maximum possible density of a voidless pavement composed of the same materials in like proportions.

After having been tested for density an approved by the Engineer, the previous layer shall be raked to a depth of one (1) inch and dampened with water immediately prior to placing the succeeding layer so that the layers are in it together. The second layer must be placed the same day as the first layer. The Engineer of the Board of Local Improvements shall

determine when the base course shall be constructed in one or more lifts. When placed, the pozzolanic mixture shall be free from segregation and shall require minimum blanding and manipulation. Immediately after placing the mixture shall be compacted with a pneumatic-tired roller, or with a vibratory compactor, or with a combination of the two. The base course, shall be given a final rolling with a three wheel or tandem roller. If the pozzolanic base is placed on gradual sub-base, the pozzolanic base shall be compacted to at least 10% of maximum density except that if more than one layer is required the first layer shall be compacted to 9% of maximum density and succeeding layers shall be compacted to 10% of maximum density.

a. Will not grant or permit any exclusive right forbidden by Section 308(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1349(a)) at the Airport, or at any other airport now owned or controlled by it;

b. Agrees that, in furtherance of the policy of the FAA under this covenant, unless authorized by the Administrator, it will not, either directly or indirectly, grant or permit any person, firm or corporation the exclusive right at the Airport, or at any other airport now owned or controlled by it, to conduct any aeronautical activities, including, but not limited to charter flights, pilot training, aircraft rental and sightseeing, aerial photography, crop dusting, aerial advertising and surveying, air carrier operations, aircraft sales and services, sale of aviation petroleum products whether or not conducted in conjunction with other aeronautical activity, repair and maintenance of aircraft, sale of aircraft parts, and any other activities which because of their direct relationship to the operation of aircraft can be regarded as an aeronautical activity.

c. Agrees that it will terminate any existing exclusive right to engage in the sale of gasoline or oil, or both, granted before July 17, 1962, at such an airport, at the earliest renewal, cancellation, or expiration date applicable to the agreement that established the exclusive right; and

d. Agrees that it will terminate any other exclusive right to conduct an aeronautical activity now existing at such an airport before the grant of any assistance under the Airport and Airway Development Act.

4. The Sponsor agrees that it will operate the Airport for the use and benefit of the public, on fair and reasonable terms, and without unjust discrimination. In furtherance of the covenant (but without limiting its general applicability and effect), the Sponsor specifically covenants and agrees:

a. That in its operation and the operation of all facilities on the Airport, neither it nor any person or organization occupying space or facilities thereon will discriminate against any person or class of persons by reason of race, color, creed, or national origin in the use of any of the facilities provided for the public on the Airport.

b. That in any agreement, contract, lease, or other arrangement under which a right or privilege at the Airport is granted to any person, firm, or corporation to conduct or engage in any aeronautical activity for furnishing services to the public at the Airport, the Sponsor will insert and enforce provisions requiring the contractor:

(1) to furnish said service on a fair, equal, and not unjustly discriminatory basis to all users thereof, and

(2) to charge fair, reasonable, and not unjustly discriminatory prices for each unit or service; Provided, That the contractor may be allowed to make reasonable and nondiscriminatory discounts, rebates, or other similar types of price reductions to volume purchasers.

c. That it will not exercise or grant any right or privilege which would operate to prevent any person, firm or corporation operating aircraft on the Airport from performing any services on its own aircraft with its own employees (including, but not limited to maintenance and repair) that it may choose to perform.

d. In the event the Sponsor itself exercises any of the rights and privileges referred to in subsection b, the services involved will be provided on the same conditions as would apply to the furnishing of such services by contractors or concessionaires of the Sponsor under the provisions of such subsection b.

5. Nothing contained herein shall be construed to prohibit the granting or exercise of an exclusive right for the furnishing of nonaviation products and supplies or any service of a nonaeronautical nature or to obligate the Sponsor to furnish any particular nonaeronautical service at the Airport.

6. The Sponsor will operate and maintain in a safe and serviceable condition the Airport and all facilities thereon and connected therewith which are necessary to serve the aeronautical users of the Airport other than facilities owned or controlled by the United States, and will not permit any activity thereon which would interfere with its use for airport purposes: Provided, That nothing contained herein shall be construed to require that the Airport be operated for aeronautical uses during temporary periods when snow, flood, or other climatic conditions interfere with such operation and maintenance; And Provided Further, That nothing herein shall be construed as requiring the maintenance, repair, restoration or replacement of any structure or facility which is substantially damaged or destroyed due to an act of God or other condition or circumstance beyond the control of the Sponsor. In furtherance of this covenant the Sponsor will have in effect at all times arrangements for:

a. Operating the airport's aeronautical facilities whenever required.

b. Promptly marking and lighting hazards resulting from airport conditions, including temporary conditions, and

c. Promptly notifying airmen of any condition affecting aeronautical use of the Airport.

7. Insofar as it is within its power and reasonable, the Sponsor will, either by the acquisition and retention of easements or other interests in or rights for the use of land or airspace or by the adoption and enforcement of zoning regulations, prevent the construction, erection, alteration, or growth of any structure, tree, or other object in the approach areas of the runways of the Airport, which would constitute an obstruction to air navigation according to the criteria or standards prescribed in Section 77.23, as applied to Section 77.25, Part 77 of the Federal Aviation Regulations. In addition, the Sponsor will not erect or permit the erection of any permanent structure or facility which would interfere materially with the use, operation, or future development of the Airport, in any portion of a runway approach area in which the Sponsor has acquired, or hereafter acquires, property interests permitting it to so control the use made of the surface of the land.

8. Insofar as it is within its power and reasonable, the Sponsor will, either by the acquisition and retention of easements or other interests in or rights for the use of land or airspace or by the adoption and enforcement of zoning regulations, take action to restrict the use of land adjacent to or in the immediate vicinity of the Airport to activities and purposes compatible with normal airport operations including landing and takeoff of aircraft.

9. The Sponsor will keep up to date at all times an airport layout plan of the Airport showing (1) the boundaries of the Airport and all proposed additions thereto, together with the boundaries of all offsite areas owned or controlled by the Sponsor for airport purposes, and proposed additions thereto; (2) the location and nature of all existing and proposed airport facilities and structures (such as runways, taxiways, aprons, terminal buildings, hangars and roads), including all proposed extensions and reductions of existing airport facilities; and (3) the location of all existing and proposed nonaviation areas and of all existing improvements thereon. Such airport layout plan and each amendment, revision, or modification thereof, shall be subject to the approval of the FAA, which approval shall be evidenced by the signature of a duly authorized representative of the FAA on the face of the airport layout plan. The Sponsor will not make or permit the making of any changes or alterations in the Airport or any of its facilities other than in conformity with the airport layout plan as so approved by the FAA, if such changes or alterations might adversely affect the safety, utility, or efficiency of the Airport.

10. All facilities of the Airport developed with Federal aid and all those usable for the landing and taking off of aircraft, will be available to the United States at all times, without charge, for use by government aircraft in common with other aircraft, except that if the use by government aircraft is substantial, a reasonable share, proportional to such use, of the cost of operating and maintaining facilities so used, may be charged. Unless otherwise determined by the FAA, or otherwise agreed to by the Sponsor and the using agency, substantial use of an airport by government aircraft will be considered to exist when operations of such aircraft are in excess of those which, in the opinion of the FAA, would unduly interfere with use of the landing area by other authorized aircraft, or during any calendar month that:

a. Five (5) or more government aircraft are regularly based at the airport or on land adjacent thereto; or

b. The total number of movements (counting each landing as a movement and each takeoff as a movement) of government aircraft is 300 or more, or the gross accumulative weight of government aircraft using the Airport (the total movements of government aircraft multiplied by gross certified weights of such aircraft) is in excess of five million pounds.

11. Whenever so requested by the FAA, the Sponsor will furnish without cost to the Federal Government, for construction, operation, and maintenance of facilities for air traffic control activities, or weather reporting activities and communication activities related to air traffic control, such areas of land or water, or estate therein, or rights in buildings of the Sponsor as the FAA may consider necessary or desirable for construction at Federal expense of space or facilities for such purposes. The approximate amounts of areas and the nature of the property interests and/or rights so required will be set forth in the Grant Agreement relating to the Project. Such areas or any portion thereof will be made available as provided herein within 4 months after receipt of written request from the FAA.

12. The airport operator or owner will maintain a fee and rental structure for the facilities and services being provided the airport users which will make the Airport as self-sustaining as possible under the circumstances existing at the Airport, taking into account such factors as the volume of traffic and economy of collection.

13. The Sponsor will furnish the FAA with such annual or special airport financial and operational reports as may be reasonably requested. Such reports may be submitted on forms furnished by the FAA, or may be submitted in such manner as the Sponsor elects so long as the essential data are furnished. The Airport and all airport records and documents affecting the Airport, including deeds, leases, operation and use agreements, regulations, and other instruments, will be made available for inspection and audit by the Secretary and the Comptroller General of the United States, or their duly authorized representatives, upon reasonable request. The Sponsor will furnish to the FAA or to the General Accounting Office, upon request, a true copy of any such document.

14. All project accounts and records will be kept in accordance with a standard system of accounting if so prescribed by the Secretary.

15. If at any time it is determined by the FAA that there is any outstanding right or claim of right in or to the Airport property, other than those set forth in Part II, paragraphs 7(a), 7(b), and 7(c), the existence of which creates an undue risk of interference with the operation of the Airport or the performance of the covenants of this Part, the Sponsor will acquire, extinguish, or modify such right or claim of right in a manner acceptable to the FAA.

16. The Sponsor will not enter into any transaction which would operate to deprive it of any of the rights and powers necessary to perform any or all of the covenants made herein, unless by such transaction the obligation to perform all such covenants is assumed by another public agency found by the FAA to be eligible under the Act and Regulations to assume such obligations and having the power, authority, and financial resources to carry out all such obligations. If an arrangement is made for management or operation of the Airport by any agency or person other than the Sponsor or an employee of the Sponsor, the Sponsor will reserve sufficient rights and authority to insure that the Airport will be operated and maintained in accordance with the Act, the Regulations, and these covenants.

17. Unless the context otherwise requires, all terms used in these covenants which are defined in the Act and the Regulations shall have the meanings assigned to them therein.

Part IV–PROJECT AGREEMENT

If the Project or any portion thereof is approved by the FAA, and an offer of Federal aid for such approved Project is accepted by the Sponsor, it is understood and agreed that all airport development included in such Project will be accomplished in accordance with the Act and the Regulations, the plans and specifications for such development, as approved by the FAA, and the Grant Agreement with respect to the Project.

Article VIII

In the event the premises or the building of which the premises are a part shall be damaged or destroyed by fire or other casualty, the same may be promptly repaired or rebuilt by Landlord at its expense as soon as funds are available but Landlord shall not be obligated to repair, rebuild, restore or replace any fixtures, equipment, displays or other property installed by Tenant pursuant to this agreement.

Provided, however, that Landlord may elect, at its sole option, not to repair or reconstruct the premises or the building, of which the premises are a part, and upon written notice of such election from Landlord to Tenant the obligation of Tenant to pay rent shall cease and this agreement shall thereupon terminate.

Article IX

Access, Ingress, Egress and Inspection Mode of Operation and Personnel

Landlord hereby grants to Tenant the right of access and ingress to and egress from the premises by Tenant and its employees, contractors, suppliers, servicemen, sublessees, guests, patrons and invitees; provided, that such rights of access, ingress and egress, are at all times exercised in conformance with the further provisions of this agreement and any and all regulations promulgated by Landlord or the Commissioner, or other lawful authority, for the care, operation, maintenance and protection of the Airport and the public.

Operations to be conducted by the Tenant under this agreement shall be done at the sole expense of the Tenant and shall be subject to general inspection by the Landlord to insure a continuing quality of services commensurate with the standards provided for in this agreement and to such other provisions of related agreements as may be pertinent as entered into between Landlord and others governing the use of and operations at the Airport, and shall be further subject in the case of operations at Chicago-O'Hare International Airport, to the provisions of paragraph 4, Article XI of that certain agreement entitled "Airport Use Agreement" and the further provisions, including the right of cancellation of Section 6.04, Article VI of that certain agreement entitled "Lease of Terminal Facilities" and to such other provisions of said related agreements as may be pertinent as entered into between the City and the Scheduled Airlines governing use and operation of Chicago-O'Hare International Airport.

Tenant does further covenant, promise and agree that said Tenant will not employ any person or persons in or about the premises or on the Airport who shall be objectionable to the Commissioner and if such persons shall be employed by Tenant, he, she, or they, shall be removed upon request of said Commissioner.

Tenant agrees to use its best efforts in every proper manner to maintain and develop the business conducted by it under this agreement and increase same and not to divert or cause, or allow, to be diverted, any business from Airport.

Article X

Non Recording

This agreement shall not and will not, nor shall any copy thereof, or any statement, paper or affidavit in any way or manner referring hereto, be filed in the office of the Recorder of Deeds of Cook or DuPage Counties, Illinois, or in any other public office, by Tenant or anyone acting for Tenant and that if the same be so filed, this agreement and each and every provision hereof shall, at the option of the Landlord, be and become absolutely null and void and Landlord may declare such filing a breach of this agreement.

Article XI

Default Confession of Judgment

If Tenant shall vacate or abandon the premises, or any part thereof, or permit the same to remain vacant or unoccupied, or in the case of the nonpayment of the rent and charges reserved hereby or any part thereof or of the breach of any covenant contained in this agreement, Tenant's right to the possession of the premises thereupon shall terminate, with or without any notice or demand whatsoever, and the mere retention of possession thereafter by Tenant shall constitute a forcible detainer of said premises, and if the Landlord so elects, but not otherwise, this agreement shall thereupon terminate.

Upon the termination of Tenant's right of possession, as aforesaid, whether this agreement be terminated or not, Tenant agrees to surrender possession of the premises immediately, without the receipt of any demand for rent, notice to quit or demand for possession of the premises whatsoever, and Tenant hereby grants to Landlord full and free license to enter into and upon said premises, or any part thereof, to take possession thereof without process of law and to expel and remove Tenant, or any other person who may be occupying the premises, or any part thereof.

Landlord may use such force in and about expelling and removing Tenant and said other person as may reasonably be necessary and Landlord may repossess itself of the said premises as of its former estate, but said entry of said premises shall not constitute a trespass or forcible entry or detainer, nor shall it cause forfeiture of charges due by virtue hereof, nor a waiver of any covenant, agreement or promise contained in said agreement, to be performed by Tenant.

Tenant hereby waives all notice of any election made by Landlord under this agreement, demand for rent, notice to quit, demand for possession, and

any and all notices and demands whatsoever, of any and every nature, which may or shall be required by any statute of this State relating to forcible entry and detainer, or to Landlord and Tenant, or any other statute, or by the common law during the terms of this agreement.

The acceptance of rent, whether in a single instance or repeatedly, after it falls due, or after knowledge of any breach hereof by Tenant, or the giving or making of any notice or demand, whether according to any statutory provisions or not, or any act or series of acts, except an express written waiver, shall not be construed as a waiver of Landlord's right to act without notice or demand or of any other right hereby given Landlord, or as an election not to proceed under the provisions of this agreement.

If default to be made in the payment of the rent, or other charges herein reserved, or of any installment thereof, as herein provided, Tenant does hereby irrevocably constitute any attorney of any Court of Record in this State attorney for it and, in its name, from time to time, to waive the issuance of process and service thereof, to waive trial by jury, to confess judgment in favor of Landlord and against Tenant for the amount of rent which may be then due, by virtue of the terms hereof, or of any extensions or renewals hereof, or by virtue of any holdover after the termination hereof, and which may be in default, as aforesaid, together with the costs of such proceedings and for said purposes to file in said cause his cognovit thereof, and to make an agreement in said cognovit, or elsewhere, waiving and releasing all errors which may intervene in any such proceeding and waiving and releasing all right of appeal and right to writ of error, and consenting to an immediate execution upon such judgment, and Tenant hereby confirms all that said attorney may lawfully do by virtue hereof.

Landlord shall have a first lien on Tenant's interest hereunder, and on Tenant's property now or hereafter located in said premises, or elsewhere, to secure payment of all moneys due hereunder, which lien may be foreclosed in equity and in case of any such foreclosure proceeding, a receiver shall be appointed to take possession of said premises and property and relet the premises under order of court.

The obligation of Tenant to pay the rent reserved hereby during the balance of the term hereof, or during any extension thereof, shall not be deemed to be waived, released or terminated, nor shall the right and power to confess judgment given in the preceding paragraphs hereof be deemed to be waived or terminated by the service of any five-day notice, other notice to collect, demand for possession, or notice that the tenancy hereby created will be terminated on the date therein named, the institution of any action of forcible detainer or ejectment, or any judgment for possession that may be rendered in such action, or any other act or acts resulting in the termination of Tenant's right to possession of the premises.

The Landlord may collect and receive any rent due from Tenant and payment or receipts thereof shall not waive or affect any such notice, demand, suit or judgment, or in any manner whatsoever waive, affect, change, modify or alter any rights or remedies which Landlord may have by virtue hereof.

Tenant shall pay and discharge all costs, expenses and attorney's fees which shall be incurred and expended by Landlord in enforcing the covenants and agreements of this agreement, whether by the institution of litigation or in the taking advice of counsel, or otherwise.

The rights and remedies hereby created are cumulative and the use of one remedy shall not be taken to exclude or waive the right to the use of another.

Tenant shall observe and comply with all laws, ordinances, rules and regulations of the United States Government, State of Illinois, Counties of Cook and DuPage, City of Chicago and all agencies thereof which may be applicable to its operations or to the operation, management, maintenance or administration of the Airport, now in effect or hereafter promulgated.

To insure faithful performance of the covenants, conditions and agreements herein contained, Tenant, at the expense of Tenant shall, before exercising any rights or privileges accorded hereunder, furnish a bond in form, kind and amount as determined and directed solely by the Comptroller for incorporation within this agreement as attachment thereto.

Such action shall include, but not be limited to the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship.

Tenant hereby waives all notice of any election made by Landlord under this agreement, demand for rent, notice to quit, demand for possession, and any and all notices and demands whatsoever, of any and every nature, which may or shall be required by any statute of this State relating to forcible entry and detainer, or to Landlord and Tenant, or any other statute, or by the common law during the terms of this agreement. The acceptance of rent, whether in a single instance or repeatedly, after it falls due, or after knowledge of any breach hereof by Tenant, or the giving or making of any notice or demand, whether according to any statutory provisions or not, or any act or series of acts, except an express written waiver, shall not be construed as a waiver of Landlord's right to act without notice or demand or of any other right hereby given Landlord, or as an election not to proceed under the provisions of this agreement.

If default be made in the payment of the rent, or other charges herein reserved, or of any installment thereof, as herein provided, Tenant does hereby irrevocably constitute any attorney of any Court of Record in this State, attorney for it and in its name, from time to time, to waive the issuance of process and service thereof, to waive trial by jury, to confess judgment in favor of Landlord and against Tenant for the amount of rent which may be then due, by virtue of the terms hereof, or of any extensions or renewals hereof, or by virtue of any holdover after the termination hereof, and which may be in default, as aforesaid, together with the costs of such proceedings and for said purposes to file in said cause his cognovit thereof, and to make an agreement in said cognovit, or elsewhere, waiving and releasing all errors which may intervene in any such proceeding and waiving and releasing all right of appeal and right to writ of error, and consenting to an immediate execution upon such judgment, and Tenant hereby confirms all that said attorney may lawfully do by virtue hereof. Landlord shall have a first lien on Tenant's interest hereunder, and on Tenant's property now or hereafter located in said premises, or elsewhere, to secure the payment of all moneys due hereunder, which lien may be foreclosed in equity and in case of any such foreclosure proceeding, a receiver shall be appointed to take possession of said premises and property and relet the premises under order of court.

The obligation of Tenant to pay the rent reserved hereby during the balance of the term hereof, or during any extension thereof, shall not be deemed to be waived, released or terminated, nor shall the right and power to confess judgment given in the preceding paragraph hereof be deemed to be waived or terminated by the service of any five-day notice, other notice to collect, demand for possession, or notice that the tenancy hereby created will be terminated on the date therein named, the institution of any action of forcible detainer or ejectment, or any judgment for possession that may be rendered in such action, or any other act or acts resulting in the termination of Tenant's right to possession of the premises. The Landlord may collect and receive any rent due from Tenant and payment or receipts thereof shall not waive or affect any such notice, demand, suit or judgment, or in any manner whatsoever waive, affect, change, modify, or alter any rights or remedies which Landlord may have by virtue hereof.

Tenant shall pay and discharge all costs, expenses and attorney's fees which shall be incurred and expended by Landlord in enforcing the covenants and agreements of this agreement, whether by the institution of litigation or in the taking advice of counsel, or otherwise.

The rights and remedies hereby created are cumulative and the use of one remedy shall not be taken to exclude or waive the right to the use of another.

(16) The Village agrees to prevent excessive use and waste of water.

(17) The Village agrees to appropriate annually sufficient money or so much thereof, as may be necessary, to provide sufficient funds for the payment of the water furnished by the City hereunder. (18) It is further agreed that the City may either in law or equity, by suit, mandamus or other proceedings, enforce or compel performance of any and all covenants herein contained.

(24) The Village further agrees not to sell, lease or give any interest in or right or privilege to utilize its water supply main or mains to any other municipality or any consumer of water whose premises are located outside the corporate limits of the Village, and further agrees not to permit any connection to be made to its water supply main or mains, except to supply consumers within the corporate limits of the Village without first securing the consent in writing of the City Council of the City so to do.

(25) At the end of each calendar year during the term of this contract and not later than March 31st of each year, the Village agrees to submit to the Commissioner of Water and Sewers of the City a report in writing showing in cubic feet or gallons the amount of water furnished the Village and the amount in quantity and charges billed by it to consumers during the preceding year and to furnish such other information regarding billing, collections and delinquencies as may be requested from time to time by said Commissioner of Water and Sewers.

(26) At the end of each billing period, but at least quarterly, the Village agrees to submit to the Commissioner of Water and Sewers of the City a complete list of all water consumers of the Village located or residing outside its corporate limits, showing name, location, character of occupancy, amount of water in cubic feet or gallons furnished, charges billed and payment to the City of Chicago at the higher rate.

(27) To secure prompt payment of the water bills, the City shall have the right at any time to require the Village to pay in advance a sum of money estimated by the Commissioner of Water and Sewers of the City to be equal to the cost of water required by the Village, for a period of ninety (90) days at the then prevailing meter rate, which said advance payment the Village hereby agrees to make upon demand.

(31) If the Village shall refuse, neglect or fail to pay promptly the water bills rendered for the water supplied it hereunder within the time or times prescribed by the ordinance of the City, or if the Village shall fail to comply with or perform any of the conditions or obligations on their part to be complied with or to be performed hereunder, and if after such failure the City shall deliver at the Village Hall of the Village addressed to the President and Board of Trustees of the Village a notice in writing of its intention to shut off the supply of water on account of such failure, refusal or neglect, then the City shall have the right to shut off the supply at the expiration of five (5) days after the giving of such notice, and to terminate this contract unless within such five (5) days the Village shall make good such failure. The shutting off of the supply of water for any such cause shall not release the Village from its obligation to make payments of any amount due or to become due in accordance with the terms hereof.

(32) No assignment or transfer of this agreement shall be made by the Village.

(33) No officer, official or agent of the City has the power to amend, modify or alter this agreement or waive any of its conditions or to bind the City by making any promise or representation not contained herein.

(34) This agreement is subject to cancellation by the City of Chicago in the event the Supreme Court of the United States of America or any other court of competent jurisdiction decrees that the City has no right to contract for, sell, disperse, or distribute water or limits the amount of water the City may use for domestic pumpage or otherwise places a burden on the City in connection with the withdrawal of water from Lake Michigan or the disposal of water from Lake Michigan to any municipality or user residing outside of the limits of the City of Chicago.

(a) to provide, maintain and operate reservoirs of sufficient capacity to store the maximum day's supply of water and to take water from the mains of the Village at a substantial uniform rate of flow.

(f) not to resell or to permit any water so furnished to be used to supply any other municipality or any other consumer located outside its corporate limits except if and when it should be specifically authorized so to do by the City Council of the City and the Village.

(4) The Village shall pay to the City all charges for water furnished hereunder to supply consumers within the corporate limits of the Village, consumers within the corporate limits of the Village of Chicago Ridge, consumers within the corporate limits of the City of Palos Hills, consumers within the corporate limits of the City of Oak Forest and consumers within the corporate limits of the Village of Tinley Park, when due, at the rate fixed by the ordinance of the City now in force and effect, or which may hereafter be amended, for water furnished through meters in like large quantities to consumers within the corporate limits of the City.

(5) The Village shall pay to the City all charges for water furnished hereunder to supply consumers located outside the corporate limits of the Village and located outside the corporate limits of the Village of Chicago Ridge, City of Palos Hills, City of Oak Forest, Village of Tinley Park, or either of them, when due, at the rate of fifty per-cent (50%) higher than the rate fixed by the ordinance of the City now in force and effect, or which may hereafter be amended, for water furnished through meters in like large quantities to consumers within the corporate limits of the City.

(6) The Village shall be entitled to the same discount or benefit allowed to metered consumers of the City, as provided by the ordinances of the City now in force and effect, or which may hereinafter be amended, if the Village pays its water bills within the time prescribed by ordinance.

(7) The City reserves the right at any time during the term of this contract to classify water consumers and to fix rates for each class of consumer; also to fix rates for water furnished to the Village and other municipalities and persons or other water users, for consumption outside the corporate limits of the City, higher than the rates fixed for water furnished to consumers of the same class for consumption within the corporate limits of the City, subject to such limitations as are then applicable by law.

Period of Contract

(8) This contract shall be in force and continue in effect for a period not longer than ten years from the date hereof unless sooner terminated as herein provided.

Meters and Meter Equipment

(9) The Village, at its own cost and expense, shall provide and install the meter vaults, the meters and meter equipment measuring and controlling the said supply of water, which vaults, meters and meter equipment shall be of such type, size and design as shall be satisfactory to and approved by the Commissioner of Water and Sewers of the City and shall be located in or near the City limits at a location to be approved by said Commissioner of Water and Sewers. The control valves shall be located within the City and such meters, meter equipment, meter vaults and valves shall at all times be under the control of the City, but the full and complete maintenance and protection of such meters, meter equipment and meter vaults shall be the obligation of the Village.

(10) The properly authorized officers, agents and representatives of the City shall at all times have free access to the meter or meters and all other facilities herein provided for, for the purpose of shutting off the water for failure to pay the water rates or charges in this agreement provided to be paid by the Village and for the purpose of reading the registrations of said meter or meters, and to examine, shut off and test the same to ascertain whether or not they are in good condition and repair and to make such repairs upon the same as may be necessary, the expense of any and all necessary repairs to be borne by the Village.

(11) If at any time the said meter or meters shall fail to register correctly the quantity of water furnished and taken hereunder, or shall fail to register the flow of water through said meter or meters, the unregistered, under-registered or over-registered amount of water furnished and taken shall be determined by taking an average of the twelve (12) preceding readings of such meter or meters exclusive of deficient or excessive readings. Where said meter or meters have been installed for a period of less than one (1) year, or where less than twelve (12) competent readings exist, such average or estimate may be based upon a lesser number than twelve (12) readings taken preceding or subsequent to such incorrect or stopped registrations. In both instances, the Commissioner of Water and Sewers of the City shall determine which are excessive or which are deficient readings and shall also determine the number of months upon which such estimate is to be based.

Terms and Conditions of Service

(12) The Village at its own cost and expense, shall provide, make and keep in repair all feeder mains, connections, meter vaults, receiving tank or tanks, booster or other pumps and slow-acting valves, or other appliances deemed necessary by the Commissioner of Water and Sewers of the City at the points of connection herein designated. If at any time the meter or meters or meter housing, which are also to be provided by the Village, shall prove unsatisfactory to said Commissioner of Water and Sewers, or be out of repair, they shall be replaced or repaired by the City, and the cost and expense of such replacements or repairs shall be charged to and paid by the Village.

(13) The Village shall provide, install, maintain and operate at its own cost and expense and at such locations as shall be designated by the Commissioner of Water and Sewers of the City, the following:

A shut-off gate or gates, reservoir or reservoirs of sufficient capacity to store not less than the maximum day's supply of water; receiving tank or tanks, booster or other pumps, slow-acting valves and such other appliances or devices as may be required by said Commissioner of Water and Sewers for the purpose of increasing, decreasing, and otherwise, controlling the water supply furnished and taken hereunder, said equipment and appliances to be of such type, size and design as shall be satisfactory to and approved by said Commissioner of Water and Sewers, and the entire installation thereof shall be under the direction of and performed in a manner satisfactory to and approved by said Commissioner of Water and Sewers. The Village agrees to maintain and operate said reservoir or reservoirs of such capacity that water will be drawn from the City's mains at a substantial uniform rate of flow, as hereinafter provided during the period of this contract.

(14) The water supply furnished and taken hereunder shall be drawn by the Village at a substantial uniform rate of flow throughout twenty-four (24) hours of each day of the year.

It is hereby agreed that the Commissioner of Water and Sewers of the City and his authorized representatives shall have access to and the right to adjust and control valves and meters in order to limit the flow of water as herein provided and for the purpose of meeting any and all emergencies and necessitous requirements.

(15) The Village agrees to comply with any and all sanitary regulations of the City and the present and future rules, regulations and instructions of the Department of Water and Sewers of the City applicable to cross-connections and dual water supplies as are in force in the Chicago Water System. The Village further agrees that the duly authorized engineers and inspectors of the City, in collaboration with the representatives of the Village shall be allowed to make inspections and require tests for tightness of the piping of the water works installations, and of all plants or other buildings of water users within the territorial limits of the Village and the Village further agrees to make such changes in its piping and to eliminate such cross-connections or other connections as in the judgment of the Commissioner of Water and Sewers of the City are necessary. The failure, neglect or refusal on the part of the Village to make promptly and properly such changes in its piping, to maintain tightness or to eliminate undesirable connections upon notice in writing so to do from said Commissioner of Water and Sewers, shall furnish sufficient grounds for the City to shut off the water and discontinue the service hereunder until changes and corrections in said piping or connections required by the City are made by the Village.

(16) The Village agrees to prevent excessive use and waste of water.

(17) The Village agrees to appropriate annually sufficient money or so much thereof, as may be necessary, to provide sufficient funds for the water furnished by the City hereunder. The Village further agrees that it will at all times charge its water consumers sufficient rates in order to provide adequate funds for the payment of water furnished it by the City.

(18) It is further agreed that the City may either in law or equity, by suit, mandamus or other proceedings, enforce or compel performance of any and all covenants herein contained.

(19) In order to safeguard its water supply received hereunder and the City's water supply, the Village hereby agrees to maintain a safe water supply throughout its system and to provide, maintain and operate at all times during the period of this contract, chlorinating equipment or other equally effective health protecting process equipment of such kind and capacity that a proper chlorine residual or similarly effective result may be carried throughout its water supply system. All proposed water works improvements, which must be approved by the Commissioner of Water and Sewers of the City, shall be disinfected in accordance with the requirements of the Department of Water and Sewers of the City; said water works improvements shall not be placed into service until approved as to sanitary quality.

(20) The City may adopt any protective or health measures it deems advisable or desirable for the benefit of its water consumers, such as the fluoridation of its water, in any manner that the Commissioner of Water and Sewers of the City shall see fit.

(21) The Village agrees to notify the Commissioner of Water and Sewers of the City as promptly as possible of all emergency and other conditions which may directly or indirectly affect the quality of the water received hereunder and the City's water supply and further agrees that the duly authorized engineers and inspectors of the City shall be allowed to make inspections and required tests of the quality of the water supply as received hereunder, as well as the quality of the water within the Village distribution system.

(22) The Village agrees not to resell or permit any water furnished hereunder to be used to supply any other municipality or any consumer of water located or residing outside the corporate limits of the Village, except as provided for herein, unless it is specifically authorized so to do by the City Council of the City.

(23) The Village agrees to use City water exclusively during the period of this contract.

(24) The Village further agrees not to sell, lease or give any interest in or right or privilege to utilize its water supply main or mains to any other municipality or any consumer of water whose premises are located outside the corporate limits of the Village, and further agrees not to permit any connection to be made to its water supply main or mains, except to supply consumers within the corporate limits of the Village without first securing the consent in writing of the City Council of the City so to do.

(25) At the end of each calendar year during the term of this contract and not later than March 31st of each year, the Village agrees to submit to the Commissioner of Water and Sewers of the City

a report in writing showing in cubic feet or gallons the amount of water furnished the Village and the amount in quantity and charges billed by it to consumers during the preceding year and to furnish such other information regarding billing, collections and delinquencies as may be requested from time to time by said Commissioner of Water and Sewers.

(26) At the end of each billing period, but at least quarterly, the Village agrees to submit to the Commissioner of Water and Sewers of the City a complete list of all water consumers of the Village located or residing outside its corporate limits, showing name, location, character of occupancy, amount of water in cubic feet or gallons furnished, charges billed and payment to the City of Chicago at the higher rate.

(27) To secure prompt payment of the water bills, the City shall have the right at any time to require the Village to pay in advance a sum of money estimated by the Commissioner of Water and Sewers of the City to be equal to the cost of water required by the Village, for a period of ninety (90) days at the then prevailing metered rate, which said advance payment the Village hereby agrees to make upon demand.

(28) The City shall not be responsible in damages for any failure to supply water or for interruption of the water furnished hereunder. The Village agrees to save and keep harmless the City from all damage to real and personal property occasioned or caused by the making of the water connection or connections herein referred to or caused by the furnishing of water hereunder, and shall also save and keep harmless the City from all damage of any kind, nature and description which may arise as the result of the making of this agreement.

(29) The City reserves the right to its Commissioner of Water and Sewers to decide all questions arising as to the proper performance of this contract.

(30) In furtherance and not in limitation of this contract, it is mutually agreed that all rights of the City and the Village under the water supply contract No. 24342 dated August 13, 1963 by and between the City of Chicago and the Village of Oak Lawn, and amendments thereto dated February 25, 1964 and April 12, 1966, and all rights of either party arising from the delivery of water prior to the date of the execution of this agreement are extinguished, except for the express reservation of the right of the City to obtain for, or to enforce collection of any unpaid water charges accruing prior to the date of execution of this agreement.

(31) If the Village shall refuse, neglect or fail to pay promptly the water bills rendered for the water supplied it hereunder within the time or times prescribed by the Ordinance of the City, or if the Village shall fail to comply with or perform any of the conditions or obligations on their part to be complied with or to be performed hereunder, and if after such failure the City shall deliver at the Village Hall of the Village addressed to the President and Board of Trustees of the Village a notice in writing of its intention to shut off the supply of water on account of such failure, refusal or neglect, then the City shall have the right to shut off the supply at the expiration of five (5) days after the giving of such notice, and to terminate this contract unless within such five (5) days the Village shall make good such failure. The shutting off of the supply of water for any such cause shall not release the Village from its obligation to make payments of any amount or amounts due or to become due in accordance with the terms hereof.

(32) No assignment or transfer of this agreement shall be made by the Village.

(33) No officer, official or agent of the City has the power to amend, modify or alter this agreement or waive any of its conditions or to bind the City by making any promise or representation not contained herein.

(34) This agreement is subject to cancellation by the City of Chicago in the event the Supreme Court of the United States of America or any other court of competent jurisdiction decrees that the City has no right to contract for, sell, disperse, or distribute water or limits the amount of water the City may use for domestic pumpage or otherwise places a burden on the City in connection with the withdrawal of water from Lake Michigan or the disposal of water from Lake Michigan to any municipality or user residing outside of the limits of the City of Chicago.

(35) The authority of the officials of the City to execute this agreement is evidenced by the authority of the City Council of the City of Chicago given on the ..... day of ..... A.D., 19....., and published in the Journal of Proceedings of the City Council for said date on pages ..... thereof.

(36) The authority of the officials of the Village to execute this agreement is evidenced by the resolution passed by the President and Board of Trustees of the Village of Oak Lawn at a regular meeting of said President and Board of Trustees duly held on the ..... day of .....A.D., 19.....

Section 8. Said Commission is hereby fully authorized immediately to investigate every such complaint thus filed. If the Commission determines that the respondent has not engaged in any unlawful practice, it shall state its findings of fact in writing and dismiss the complaint. If the Commission determines after such investigation that probable cause exists for the allegations made in the complaint, the Commission shall set a date for a conciliation hearing. At such hearing, the Commission or any member thereof shall interview the complainant and the person or persons against whom the complaint has been directed and shall attempt to resolve the complaint by all proper methods of conciliation and persuasion. If such attempts at conciliation are not successful within sixty days after the date of filing of the complaint, the Commission shall then proceed promptly with full hearing of the complaint.

Section 9. Such hearing shall be conducted by the Commission, or any member thereof, upon due and reasonable notice to all parties. The Commission shall have full power to subpoena witnesses and pertinent documents, which power may be enforced by the Commission by proper petition to any court of competent jurisdiction. The Commission shall have power to administer oaths and to take sworn testimony. At the conclusion of the hearings, the Commission shall render a written report and recommendations, which shall be served by mail upon the complainant and the respondent. No report shall be delayed more than sixty days after the date of issuance of notice for commencement of the first hearing.

Section 10. The Commission shall be empowered at the conclusion of such proceedings and as part of its report, to recommend to the Corporation Counsel that an ordinance violation action be taken against any respondent, and, in addition thereto in case of a real estate broker, to recommend to the Mayor of the City of Chicago the suspension or revocation of the broker's license of any broker licensed by the City of Chicago who shall have been a respondent to any proceedings thus filed and found guilty of violation of any applicable provision of the within ordinance. Any broker whose license has been suspended or revoked by the Mayor, or any complainant aggrieved by the decision of the Mayor, shall have full right to appeal from such order of suspension or revocation in accordance with procedure specified in the Administrative Review Act of Illinois. The order of the Mayor shall be final and transmitted to the Commission as part of its record and it shall serve a copy thereof upon the respondent, and any appeal may be taken thereafter.

Section 11. In addition thereto, the Mayor may direct the Corporation Counsel to file with the Department of Registration and Education of the State of Illinois a complaint against any real estate broker found guilty of violating any provision of this ordinance, seeking suspension or revocation of the license issued to such broker by the State of Illinois.

Section 12. If any section, subdivision, paragraph, sentence or clause of this ordinance is for any reason to be invalid or unconstitutional, such decision shall not affect any remaining portion, section or part thereof.

Section 13. Any owner, lessee, sublessee, assignee, managing agent, or other person, firm, corporation, or real estate broker, who shall violate or fail to comply with any of the provisions of this ordinance shall be punished by a fine in any sum not exceeding five hundred dollars ($500.00). WHEREAS, The commitment to individual liberty is enshrined in American tradition, and,

Article II

Assignment or Transfer, Subleasing and Independence of Agreement

The Operator shall not, without prior approval of the corporate authorities of the City, assign or transfer this Agreement, nor any share, part or interest therein, or any of the rights or privileges granted hereby, nor enter into any contract requiring or permitting the doing of anything hereunder by an independent contractor unless otherwise expressly provided herein.

Operator further agrees that it shall not enter into any agreement of any nature, formal or informal, concerning other business activities at Chicago-O'Hare International Airport, with any individual, partnership or corporation without prior approval of the corporate authorities of the City, it being understood that the only activity that Operator may conduct directly or indirectly, alone or through others, on, upon or from said Airport and facilities located thereon, be they demised to others or under the control of the City, is as authorized under the terms of this Agreement.

If Operator is a corporation and if the control thereof changes at any time during the term hereof, then City may, at its option, declare such change a breach of this Agreement.

It is mutually understood and agreed that nothing contained in this Agreement is intended, or shall be construed, as in any wise creating or establishing the relationship of copartners or joint venturers between the parties hereto or as constituting the Operator as the agent or representative of the City for any purpose or in any manner whatsoever.

Article III

Acceptance of Physical Condition of Premises

It is understood and agreed that the City shall deliver to the Operator a complete and ready-to-operate Facility including, but not limited to, all electrical, elevator, mechanical and structural portions of the Parking Garage, and all parking equipment and other operating equipment necessary for the efficient and full operation of both the garage and its adjacent lot which comprise the Facility including, without limitation ticket spitters, cash registers, cashier booths, parking directional signs, bumpers, guards, fencing, striping, sewers, waterlines and lighting equipment.

It is understood and agreed that City initially will deliver to Operator a Facility which will not be actually fully completed and ready-to-operate, and Operator will operate said Facility in its partially completed condition during said interim period prior to actual completion, in order to provide service to parking patrons at the Airport. Said interim operation will also require the Operator to temporarily conduct parking operations at a site remote from the Parking Facility and designated as "Lot B" at the Airport; "Lot B" being more fully described as shown on Exhibit "B" attached hereto. Upon delivery to Operator of a complete and ready-to-operate Facility as hereinabove provided, certified complete by the Commissioner of Aviation (hereinafter called "Commissioner") in writing, Operator shall be considered to be satisfied with the physical condition of said premises and its taking possession shall constitute conclusive evidence of its receipt thereof in a completed, safe and sanitary condition, and in good order and repair, unless otherwise specified herein or as otherwise notified in writing by Operator to said Commissioner within thirty (30) days thereafter. If the Operator notifies the City during this period, the City shall notify the contractor responsible for the construction of the Facility and cause the correction of any condition so noted within a reasonable period of time. The Operator agrees and admits that no representations as to condition or repair have been made by the City or its officers, employees or agents, which are not herein expressed or endorsed hereon, and that no promises to alter, repair or improve said premises, before, at or after the execution of this Agreement by parties, not expressly contained herein, have been made by the City or its officers, employees or agents.

Operator shall pay all license or permit charges of whatever nature, if necessary, as required by law or ordinance of the City including the City of Chicago Public Garage License Fee and shall collect from each vehicle the Chicago Parking Garage Tax. Article XI

Default
Confession of Judgment

A. If the Operator shall vacate, desert or abandon the premises and Facility, or shall permit the same to remain vacated, deserted or abandoned for a period of one (1) day; or if the Operator shall breach or default any covenant, promise or condition set forth in this Agreement or shall default in the payment of any charges payable by it under this Agreement and the Operator fails to remedy such breach or default within ten (10) days after receipt of written notice of any such breach or default from the City, or if the Operator shall sell or assign without City's prior written consent or mortgage this Agreement or any provision hereof, or if the Operator shall fail to comply, after having received notice and a reasonable opportunity to comply, with any of the statutes, ordinances, rules, orders, regulations or requirements of the Federal, State and City government, or any and all of their departments and bureaus applicable or pertinent to said premises and Facility, or in the event of the incapacity of the Operator, then the Operator's right to possession of the premises and Facility thereupon shall cease and terminate, with or without any notice or demand whatsoever, and the mere retention or possession thereafter by Operator shall constitute a forcible detainer of said premises, and if the City so elects, but not otherwise, this Agreement shall thereupon terminate. Upon the termination of Operator's right of possession, as aforesaid, whether this Agreement shall be terminated or not, the Operator agrees to surrender to the City possession of the premises and Facility immediately without notice to quit or demand for possession of the premises and Facility whatsoever, and the Operator hereby grants to the City full and free license to enter into and upon said premises and Facility, or any part thereof, to take possession thereof without process of law and to expel and remove the Operator, or any other person who may be occupying the premises and Facility or any part thereof.

City may use such force in expelling and removing the Operator and such other person as may be reasonably necessary to accomplish said purpose. It is agreed by the Operator that said entry of the premises and facility by the City shall not constitute a trespass or forcible entry or detainer, nor shall it cause forfeiture of charges due by virtue of the provisions of this Agreement, nor a waiver of any covenant, agreement or promise contained in this Agreement to be performed by the Operator.

B. Operator hereby waives all notice of any election made by the City under this Agreement, demand for rent or other charges reserved under this Agreement, notice to quit, demand for possession, and any and all notices and demands whatsoever, of every kind and nature, which may or shall be required by any statute of this State relating to forcible entry and detainer, or to Landlord and Tenant, or any other statute, or under the common law, during the term of this Agreement. The acceptance of any rents or charges reserved by the City under this Agreement, whether in a single instance or repeatedly, after they shall fall due, or after knowledge of any breach hereof by the Operator, or the giving or making of any notice or demand, whether according to any statutory provisions or not, or any act or series of acts, except an express written waiver, shall not be construed as a waiver of the City's right to act without notice or demand or of any other right hereby given the City, or as an election not to proceed under the provisions of this Agreement.

C. If the Operator shall default in the payment of any charges under this Agreement, or any installment thereof as herein provided, the Operator does hereby irrevocably constitute any attorney of any Court of Record in this State as attorney for the Operator and in its name said attorney may waive the issuance of process and service thereof, may waive trial by jury, may confess judgment in favor of the City and against the Operator for any amount of rent or charges which may then be due by virtue of the provisions of the Agreement or of any extensions or renewals thereof, or by virtue of any holdover after the termination of this Agreement, and which may be in default, as aforesaid, together with the costs of such proceedings, and for said purposes may file in said cause his cognovit thereof and make an agreement in said cognovit or elsewhere waiving and releasing all errors which may intervene in any such proceeding, and waiving and releasing all right of appeal and right to writ of error, and may consent to an immediate execution upon any such judgment so secured and the Operator hereby confirms all that said attorney may lawfully do by virtue hereof. The City shall have a first lien on the Operator's interest and on the Operator's property now or hereafter located in said premises and Facility, or elsewhere, to secure the payment of all monies due hereunder, which lien may be foreclosed in equity and in case of any such foreclosure proceeding the City shall take possession of said property and re-let the premises and Facility under order of court.

D. If the Operator shall file a petition in bankruptcy or shall be involuntarily placed in bankruptcy, or shall be adjudicated a bankrupt, or shall make an assignment for the benefit of creditors, or shall take advantage of any provisions in any statute or ordinance for the advantage of insolvent persons, the City may elect to terminate this Agreement and the term hereof and take immediate possession of the premises, facility and appurtenances without notice.

E. In the event the City elects to terminate this Agreement because of a violation of any of the provisions of this Article, upon such termination the Operator shall compensate the City for any loss in revenue as may be sustained by reason of such termination and provision for such compensation shall be made a condition of the Performance Bond referred to in Article XIV of the Agreement.

F. The obligation of Operator to pay charges due to the City under this Agreement during the balance of the term hereof, or during any extension thereof, shall not be deemed to be waived, released or terminated, nor shall the right and power to confess judgment given hereinabove be deemed to be waived or terminated by any action of forcible detainer or ejectment, or any judgment for possession that may be rendered in such action, or any other act or acts resulting in the termination of Operator's right to possession of the premises.

G. Operator shall pay and discharge all costs, expenses and attorney's fees which shall be incurred and expended by City in enforcing the covenants and agreements of this Agreement, whether by the institution of litigation or in the taking advice of counsel, or otherwise.

H. The rights and remedies hereby created are cumulative and the use of one remedy shall not be taken to exclude or waive the right to the use of another.

I. If City should breach any of the covenants, terms and conditions relating to the duties or obligations of City hereunder, Operator shall have the right to terminate and end this Agreement, provided Operator gives City written notice of said breach and City fails to remedy such breach within ten (10) days after notice thereof is received, or fails to commence remedy of such breach and diligently prosecutes to completion said remedy if such breach cannot reasonably be remedied within ten (10) days.

Article XII

Laws, Ordinances, Rules and Regulations

Operator shall observe and comply with all laws, ordinances, rules and regulations of the United States Government, State of Illinois, Counties of Cook and DuPage, City of Chicago and all agencies thereof which may be applicable to its operations or to the operation, management, maintenance or administration of the Airport, now in effect or hereafter promulgated.

Article XIII

Peaceful Possession

City hereby warrants and represents that it has the authority to permit Operator to operate the Facility and to execute this Agreement, and that the laws and/or ordinances affecting the use of this Facility do not prohibit the uses herein provided. Article XIV

The Operator shall deliver to the City at the time of or prior to the execution of this Agreement a Performance Bond approved by the City Comptroller and the Corporation Counsel in the amount of Five Hundred Thousand Dollars ($500,000) payable to the City of Chicago. Said bond shall be conditioned upon the full and faithful performance by the Operator of each and every covenant, promise, term, condition, undertaking and agreement set forth in this Agreement specifically including the provision of paragraph E of Article XI thereof.

Article XV

Equal Opportunity

Operator, in performing under this Agreement, shall not discriminate against any worker, employee or applicant, or any member of the public, because of race, creed, color, religion, age, sex or national origin, nor otherwise commit an unfair employment practice.

Operator will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, creed, color, religion, age, sex or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship.

1. *Premises*

City agrees to give Operator possession of the parking garage and lot at Chicago-O'Hare International Airport known as the Chicago-O'Hare Airport Parking Facility (as well as Lot B during the remainder of the construction period of the Facility) both as described or shown on Exhibits A and B attached hereto. The City further agrees to give Operator the right of first refusal to operate any other self-park lots on the Airport which may become available for public parking during the term of this Agreement.

Possession of the premises shall, however, at all times during the term of this Operating Agreement, be subject to the right of the City, its employees, agents or contractors, to go upon the same and temporarily use such portions thereof as are necessary for the making of improvements and repairs to said parking and other Airport facilities and for the maintenance of facilities on and under the garage or lot. City will exercise diligence in minimizing the inconvenience caused by said repair or maintenance activities.

2. *Purpose*

The Operator shall operate the Facility subject to all provisions of this Agreement for the convenience of the public during the term hereof and shall use and occupy the above premises for the parking of motor vehicles and for no other purpose, and shall comply with all rules and regulations promulgated by the Commissioner for use, occupancy and operation of the Airport.

3. *Term*

The term of this Agreement shall begin on the day the Operator receives possession of the Facility in the partially completed condition provided for herein and shall terminate ten (10) years after the date of completion of the Facility, as certified by the Commissioner of Aviation, unless otherwise terminated as herein provided.

It is understood and agreed that parking rates and charges may be changed by the Commissioner when authorized and directed to do so by the City Council of the City of Chicago and the Operator agrees to make such changes when directed to do so by the Commissioner. City has disclosed and Operator is aware of the terms of certain concession agreements between City and Avis, Hertz and National Rent-A-Car companies (Council Journal February 24, 1972, pages 2655 through 2703), which agreements grant certain rights to said Rent-A-Car companies to 1,300 parking spaces in the parking garage and lot and set a compensation to be paid to City for the same. Compensation received by the City for parking spaces in the Facility under these several agreements is not included in gross receipts of the Facility and the parking spaces reserved for Rent-A-Car operations are not available for parking by the general public or other use by the Operator.

It is also recognized and agreed that this Agreement applies only to the designated parking facilities and in no manner relates to parking facilities provided by the City or Airlines for parking by persons employed at the Airport.

The compensation provided to be paid to the Operator under Sections 5(a) and 5(b) shall be payable by the City within ten (10) days after receipt of Operator's monthly statement of the gross receipts and the number of vehicles parked, as the same is provided for herein in Part II, Section 6 of this Agreement as follows:

Throughout the entire term of this Agreement, Operator shall use forms and accounting procedures and methods for its daily, monthly and annual reports of gross revenue derived from parking as directed by the Commissioner.

Operator shall:

(a) Maintain, in accordance with accepted accounting practices, during each year of the term of this Agreement, the records and reports of accounts recording all transactions relating to the gross receipts at, through or in any way connected with the Operator's operations at the Airport. Section 1.01. Lease of Premises—Use of Demised Premises.

City does hereby lease to Airline, and Airline does hereby lease from City, two (2) parcels of land comprised of three and four hundred ninety-eight one thousandths (3.498) acres:

Airline is hereby granted the exclusive use of the Demised Premises, subject to the terms and provisions hereof and to rules and regulations promulgated by City in accordance with Article VI hereof for any and all purposes reasonably necessary or convenient in connection with the conduct by Airline of air transportation, including, without limitation, the following:

(a) the receiving, delivering, dispatching, processing, handling and storing air cargo, express, mail and other property;

(d) the maintenance and operation of building's facilities and equipment and the carrying on of activities reasonably necessary or convenient in connection with the foregoing:

provided, however, that the foregoing shall not permit the conduct by Airline of any business separate from its operation of an air transportation system; and further provided, that the rights conferred under this Article I may be exercised by Airline alone or in conjunction with other Airline Parties, directly or through another designated by it or them.

Any of the premises leased to Airline under this Article I may also be used, in whole or in part, by Airline on behalf of or in conjunction with any other Airline Party or Parties in connection with the conduct of air transportation by such other Airline Party or Parties, to the same extent as Airline is entitled to use such premises in its own behalf in connection with its conduct of air transportation. Airline shall also be entitled to sublease any of such premises, in whole (subject to the prior approval of City) or in part, to any other Airline Party or Parties for use in connection with the conduct of air transportation by such other Airline Party or Parties, to the same extent as Airline is entitled to use such premises in its own behalf in connection with its conduct of air transportation. In addition, Airline is hereby permitted to sublease any portion of the Demised Premises to any agency, division or department of the Federal Government. In case of any use of any of such premises by Airline on behalf of or in conjunction with any other Airline Party or Parties, or in case of any sublease of any of such premises in accordance with the foregoing provisions, Airline shall remain liable for its obligations hereunder and the rights and privileges granted hereunder to Airline, its employees, agents, guests, patrons and invitees and its or their suppliers of materials and furnishers of service shall be granted with respect to such premises (except as may be otherwise provided in any such sublease) to such other Airline Party or Parties or sublessee or sublessees, as the case may be, and it or their employees, agents, guests, patrons, invitees, suppliers of materials and furnishers of service.

Notwithstanding the foregoing provisions of this Section 1.03, no use of any of the premises leased to Airline under this Article I may be made by Airline on behalf of or in conjunction with any other Airline Party or Parties, and no sublease of any part of such premises may be made by Airline, except in each case with the consent of the Commissioner of Aviation, if such use or sublease involves payment to Airline by any such other Airline Party or sublessee of an amount greater than Airline's expenses with respect to the premises, facilities and services used by, furnished to or subleased to such other Airline Party or sublessee.

The ground rental shall be payable at the office of the City Comptroller. Any rental payable by Airline hereunder which is not paid when due shall bear interest at the rate of seven per cent (7%) per annum from the due date thereof until paid. If any rental hereunder commences or terminates prior to the last day of any month, such rental for such month shall be determined on a pro rata basis according to the number of days of such month involved.

Article IV

Construction and Maintenance of Air Cargo Building

Section 4.01. Construction of Air Cargo Building by Airline.

Airline shall be permitted to construct on the Demised Premises an air cargo building (which term as used herein, includes related cargo ramp aprons, facilities and fixtures necessary or incidental to normal operation of an air cargo building). For the purpose of this Section 4.01, construction of Airline's air cargo building on the Demised Premises may include construction by Airline of connections with any taxiway, service roadway, water line, sewer line, drainage ditch and utility lines serving the Demised Premises. All of the plans and specifications for Airline's construction hereunder shall be submitted to the Commissioner of Aviation and the Commissioner of Public Works for approval prior to the commencement of construction.

Section 4.02. Construction, Maintenance and Repair by Airline.

In addition to the initial construction permitted in Section 4.01, above, Airline may construct or install, at its own expense, any buildings, improvements, facilities and equipment, and any additions thereto, on the Demised Premises. All such construction or installation shall be made after obtaining any requisite building or construction licenses or permits. Plans and specifications of any such proposed construction or installation (including the initial construction and any substantial alterations or addition thereto) shall be submitted to and receive the approval of the Commissioner of Aviation and the Commissioner of Public Works prior to the commencement of construction or installation. Subject to the provisions of Section 4.01 and Article VIII hereof, Airline shall keep and maintain all buildings, improvements and facilities and additions thereto, constructed or installed by Airline on the Demised Premises in good condition and repair. No restrictions shall be placed on Airline

as to the architects, builders or contractors who may be employed by it in connection with construction, installation, alteration, repair or maintenance by Airline on the Demised Premises. All buildings and permanent improvements constructed by Airline on the Demised Premises shall become the property of City upon completion of construction thereof.

Notwithstanding the foregoing, Airline shall, after completion of the construction provided for by Section 4.01 hereof, keep the Demised Premises and all construction and installations made thereon in a sanitary and sightly condition, and shall comply with all health and safety requirements applicable thereto.

Any advertising signs installed by Airline shall be limited to those which advertise air transportation, and the number, general type, size, design and location of such signs shall be subject to the approval of the Commissioner of Aviation.

Section 4.03. Lighting. Airline shall illuminate the apron in front of each building on the Demised Premises with flood lights and shall place and maintain at all times red obstruction lights on the highest point and on each corner of such building and on the highest point of each smoke stack, pole, aerial and antenna on the Demised Premises.

The obstruction light fixtures shall be of a dual type and the lights shall be kept burning at Airline's expense from dusk to dawn and during periods of restricted visibility.

Section 4.04. Covenant Against Liens. Airline shall keep the Demised Premises and the buildings, improvements and facilities constructed thereon free and clear of any and all liens in any way arising out of the action, or use thereof, by Airline; provided, however, that Airline may in good faith contest the validity of any lien.

Section 4.05. Performance by City upon Failure of Airline to Maintain. In the event Airline fails to perform for a period of thirty (30) days after notice from City so to do, any obligation required by Sections 4.02, 4.03 and 4.04 hereof to be performed by Airline, City may enter the premises involved (without such entering causing or constituting a termination of this Lease or an interference with the possession of said premises by Airline) and do all things necessary to perform such obligation, charging to Airline the cost and expense thereof and Airline agrees to pay City such charge in addition to any other amounts payable by Airline hereunder; provided, however, that if Airline's failure to perform any such obligation endangers the safety of the public or of employees of City, and City so states in its notice to Airline, City may perform such obligation of Airline at any time after the giving of such notice and charge to Airline, and Airline shall pay, as aforesaid, the cost and expense of such performance.

Article V

Performance by City

Section 5.01. Facilities Furnished by City. In addition to the taxiways and roadways connections to be constructed by Airline, City has constructed taxiways, roadways, water lines, sewer lines and drainage ditches serving the Demised Premises. Airline is granted the right and privilege to use all of such taxiways, roadways, water lines, sewer lines and drainage ditches in common with others; provided, however, that Airline shall be required to pay to City a reasonable charge for direct metered water supplied by City to Airline through any such water line.

Section 5.02. Maintenance and Operation. City shall operate and maintain, in all respects in a manner consistent with that of a reasonably prudent operator of an airport, and keep in good condition and repair (including the removal of snow, vegetation, stones and other foreign matter as reasonably as may be done, from taxiways, including roadways, apron and taxiways constructed by Airline pursuant to Section 4.01 and located outside the Demised Premises) all taxiways, connections therefrom, roadways, water lines, sewer lines, drainage ditches, additions, improvements, facilities and equipment now or hereafter provided by City serving the Demised Premises but located outside the Demised Premises.

Section 5.03. Taxes on Demised Premises. Airline shall pay any and all taxes or special assessments, if any, which may be levied or assessed upon the Demised Premises; or on any personal property or leasehold of Airline located on the Demised Premises.

Section 5.04. Exclusive Possession. City agrees that Airline, performing its obligations hereunder, shall be entitled to and shall have the exclusive possession and enjoyment of the premises, rights and privileges leased to it hereunder, subject, however, to the provisions hereof.

Section 5.05. Performance by Airline upon Failure of City to Maintain and Operate. In the event City fails to perform, for a period of thirty (30) days after notice from Airline so to do, any obligation required by this Article V to be performed by City, Airline may perform such obligation of City and bill City for the cost to Airline of such performance; provided, however, that if City's failure to perform any such obligation endangers the safety of Airline's operations at the Airport and Airline so states in its notice to City, Airline may perform such obligation of City at any time after the giving of such notice and bill City for Airline's cost of such performance, but Airline shall not deduct any such cost from any amounts due hereunder or under any other agreement between Airline and City relating to the Airport unless at the time there are no Approved Revenue Bonds outstanding. City, however, shall not be liable to Airline for any loss of revenues to Airline resulting from any of City's acts, omissions or neglect in the maintenance and operation or otherwise by it of the Airport or any facilities now or hereafter connected therewith.

Article VI

Rules and Regulations

Airline shall observe and obey all rules and regulations governing the conduct and operation of the Airport, promulgated from time to time by City, which are reasonably required for the prudent and efficient operation of the Airport and are not inconsistent with the reasonable exercise by Airline of any right or privilege granted to it hereunder or under any other agreement between Airline and City relating to the Airport or any part thereof, nor inconsistent with safety nor with the rules and regulations of any Federal or State agency having jurisdiction with respect thereto, nor inconsistent with the procedures prescribed or approved from time to time by the Civil Aeronautics Administration or any other governmental authority having jurisdiction over operations at the Airport.

City, however, shall have no control over the rates, fares or charges that Airline may prescribe in connection with its conduct of an air transportation business.

Article VII

Exercise by City of Governmental Functions

Nothing contained herein shall impair the right of City in the exercise of its governmental functions to require Airline to pay any tax or inspection fees or to procure necessary permits or licenses, provided such requirement is not inconsistent with the rights and privileges granted to Airline hereunder.

Article VIII

Indemnity and Insurance

Section 8.01. Liability Arising from Act of Airline. Airline agrees to indemnify and hold City harmless from and aganst all liabilities, judgments, costs, damages and expenses which may accrue against, be charged to or recovered from City by reason or on account of damage to the property of City or the property of, injury to or death of any person, arising from Airline's use and occupancy of and operations at the Airport, including acts of its agents, contractors and subcontractors, except when caused by City's sole negligence or by the joint negligence of City and any person other than Airline, its agents, contractors and subcontractors; provided that City shall give Airline prompt and timely notice of any claim made or suit instituted which, in any way, affects Airline or its insurer, and Airline or its insurer shall have the right to compromise and defend the same to the extent of their own interests. Any final judgment rendered against City for any cause for which Airline is liable hereunder shall be conclusive against Airline as to liability and amount.

Section 8.02. Insurance in Connection with Construction by Airline. Airline shall, until the date of completion of Airline's air cargo building being constructed by Airline, keep in force insurance issued by a responsible insurance company or companies, insuring City against all liabilities for public liability or property damage arising out of or in connection with the construction upon or the use and occupancy of the Demised Premises in amounts of comprehensive insurance not less than those provided in Section 8.01 hereof, and insuring Airline's air cargo building during construction under completed builder's risk insurance, against fire, extended coverage, vandalism and sprinkler leakage in an amount equal to the full insurable value of such construction as the same progresses in order to assure continuity of construction and ultimate completion despite damage or destruction suffered during the course thereof.

Article IX

Termination by City

City may terminate this Lease by giving Airline sixty (60) days advance notice upon or after the happening and during the continuance of any one of the following events:

(b) The institution of proceedings in bankruptcy against Airline and the final adjudication of Airline as a bankruptcy pursuant to such proceedings.

(c) The taking by a court of competent jurisdiction for a period of sixty (60) days of all or substantially all of Airline's assets pursuant to proceedings brought under the provisions of any Federal reorganization act.

(d) The appointment of a receiver of all or substantially all of Airline's assets and Airline's failure to vacate such appointment within sixty (60) days thereafter.

(e) The assignment by Airline of its assets for the benefit of its creditors.

(f) The abandonment by Airline of its conduct of air transportation at the Airport.

(g) The default by Airline in the performance of any covenant or agreement required to be performed by Airline herein and the failure of Airline to remedy such default, or to take prompt action to remedy such default, within a period of sixty (60) days after receipt from City of notice to remedy the same.

No waiver by City of default of any of the terms, covenants or conditions hereof to be performed, kept and observed by Airline shall be construed to be or act as a waiver of any subsequent default of any of such terms, covenants and conditions.

Article X

Recovery of Possession by City

If Airline shall vacate or abandon the Demised Premises or in case of the termination of this Lease, Airline's right to the possession of the Demised Premises shall terminate, with or without any further notice or demand whatsoever, and the mere retention of possession thereafter by Airline shall constitute a forcible detainer of said premises, and upon the termination of Airline's right of possession, as aforesaid, Airline agrees to surrender its possession of said premises immediately, without the receipt of any demand for rent, notice to quit or demand for possession of said premises whatsoever, and hereby grants to City full and free license to enter into and upon said premises, or any part thereof, to take possession thereof, as against Airline and others claiming through it, with or without process of law, and to expel and remove Airline and any other person claiming through it who may be occupying said premises, or any part thereof, and City may use such force in and about so expelling and removing Airline and said other person as may reasonably be necessary, and City may, as against Airline and others claiming through it, repossess itself of said premises as of its former estate, but said entry of said premises shall not constitute a trespass or forcible entry or detainer, nor shall it cause forfeiture of rents due by virtue hereof, nor a waiver of any covenant, agreement or promise herein contained to be performed by Airline.

Airline hereby waives all notice of any election made by City under this Lease, demand for rent, notice to quit, demand for possession, and any and all notices and demands whatsoever of any and every nature which may or shall be required by any statute of this State relating to forcible entry and detainer, or to landlord and tenant, or any other statute, or by the common law during the term of this Lease; provided, however, the foregoing shall not apply to any notice specifically required under the provisions of this Lease. The acceptance of rent, whether in a single instance or repeatedly, after it falls due, or after knowledge of any breach hereof by Airline or the giving or making of any notice or demand, whether according to any statutory provision or not, or any act or series of acts except an express written waiver, shall not be construed as a waiver of any right hereby given City, or as an election not to proceed under the provisions of this Lease.

The obligation of Airline to pay the rent reserved hereby shall not be deemed to be waived, released or terminated, by the service of any five-day notice, other notice to collect, demand for possession, or notice by City that the tenancy hereby created will be terminated on the date therein named, the institution of any action of forcible detainer or ejectment or any judgment for possession that may be rendered in such action, or any other act or acts, other than termination of this Lease, resulting in the termination of Airline's right to possession of the Demised Premises. City may collect and receive any rent due from Airline, and payment or receipt thereof shall not waive or affect any such notice, demand, suit or judgment or in any manner whatsoever waive, affect, change, modify or alter any rights or remedies which City may have by virtue hereof.

Article XI

Termination by Airline

Airline may terminate this Lease and any or all of its obligations hereunder at any time that Airline is not in default in the payment of any amount due from it to City hereunder by giving City sixty (60) days advance notice upon or after the happening and during the continuance of any one of the following events:

(a) The failure or refusal of the Federal Aviation Administration to approve all weather operations into and from the Airport of aircraft of any type operated by Airline in scheduled air transportation using facilities similar to those at the Airport and continuance thereof for a period of at least sixty (60) days.

(b) The issuance by any court of competent jurisdiction of an injunction in any way preventing or restraining the use of the Airport or any part thereof so as to substantially affect Airline's use of the Airport in its conduct of an air transportation system and the remaining in force of such injunction, not stayed by way of appeal or otherwise, for a period of at least sixty (60) days.

(c) The issuance of any order, rule or regulation or the taking of any action by the Civil Aeronautics Board or the Federal Aviation Administration or other competent governmental authority, or the occurrence of any fire, other casualty, act of God or the public enemy, substantially affecting, for a period of at least sixty (60) days, Airline's use of the Airport in its conduct of an air transportation system; provided, however, that none of the foregoing is due to any fault of Airline.

(d) The default by City in the performance of any covenant or agreement required to be performed by City herein or in any other agreement between City and Airline relating to the Airport or any part thereof, and the failure of City to remedy such default, or to take prompt action to remedy such default, within a period of sixty (60) days after receipt from Airline of notice to remedy the same.

(e) The substantial restriction of City's operation of the Airport by action of the Federal Government, or any department or agency thereof, under its wartime or emergency powers, or by action of the State of Illinois, or any department or agency thereof, and continuance thereof for a period of not less than sixty (60) days, provided such restriction adversely affects Airline's operations at the Airport.

No waiver by Airline of default of any of the terms, covenants or conditions hereof, or of any other agreement between City and Airline relating to the Airport or any part thereof, to be performed, kept and observed by City shall be construed to be or act as a waiver of any subsequent default of any of such terms, covenants and conditions.

Article XII

Surrender of Possession

Upon termination of this Lease, Airline shall surrender the Demised Premises, and the buildings and improvements situated thereon, if any, in good condition and repair, reasonable wear and tear excepted.

Article XIII

Abatement on Account of Casualty

If due to damage or destruction by fire, other casualty, act of God or the public enemy affecting the Airport, Airline's use of the Airport in its conduct of an air transportation system shall be substantially affected, then without any prejudice to any right of termination hereunder, Airline shall have the right upon notice to City, to the abatement of a just proportion of the rental provided herein from the time of such notice until normal operations are permitted.

Article XIV

Right of Airline to Remove Property

Airline shall be entitled during the term of this Lease, and for a reasonable time (not exceeding forty-five (45) days after its termination, to remove from the premises involved, or any part thereof, all trade fixtures, tools, machinery, equipment, materials and supplies placed thereon by it pursuant to this Lease, subject, however, to any valid lien City may have thereon for unpaid rentals or other amounts, payable by Airline to City hereunder or under any other agreement between City and Airline relating to the Airport or any part thereof, and provided that Airline shall have repaired all damage resulting from such removal.

The above elevations as fixed shall be measured from Chicago City datum as established by the City Council of the City of Chicago.

The roadway(s) of the four (4) street(s) heretofore specified between the points herein described, also the roadway(s) of all intersecting alley(s) extended from the curb line to the street line on each side of said specified street(s) between the points herein described shall be so graded by cutting for filling and compacted by rolling with a roller of ten (10) tons weight that after the grading of the roadbed(s) is completed and the pavement herein described placed thereon, the surface of the finished pavement at the center of the roadway of each of said specified street(s) shall be at the elevation of the top of the curbing herein described; and the surface of the said finished pavement at the summits in the gutters between catchbasins and adjoining the roadway face of the curbing shall be three (3) inches below the top of said curbing, and at the catchbasin inlets in the gutters adjoining the roadway face of the curbing shall be nine (9) inches below the top of said curbing. The slope of the gutters adjoining the roadway face of said curbing shall be uniform from the summits to the catchbasin inlets.

A transverse section of the surface of the finished pavement and gutters shall be an arc of a circle passing through the said gutter elevations and the elevation of the center of said finished roadway at every part of the roadway of each of said specified street(s) between the points herein described.

In all intersecting alley(s) herein specified at the street line(s) of said specified street(s) the surface of the finished pavement adjoining the curbing shall be even with the top of the curbing, and the surface of the finished pavement at the center of the roadway(s) of said alley(s) shall be three (3) inches below the top of the curbing; and a transverse section of the surface of the finished pavement at the street line(s) of said specified street(s) shall be an arc of a circle passing through the surface of the pavement adjoining said curbing and the surface of the pavement at the center of said finished roadway(s), the surface of the said pavement thence shall slope gradually to meet the surface of the finished pavement at the curb line of said specified street(s).

On the sub-grade as formed and compacted shall be spread an insulation course of limestone screenings. Said insulation course shall be one (1) inch in thickness and shall extend across the full width of the roadbed.

On the insulation course as formed and compacted shall be spread a foundation course consisting of a layer of crushed limestone of the best quality, broken so as to pass through a ring of four (4) inches internal diameter and held on a ring of two (2) inches internal diameter. The stone spread shall be well graded as to sizes. It shall be evenly distributed so as to leave no pockets filled with the small size stone. This layer shall be thoroughly rolled with a self propelled three wheel roller, weighing not less than ten (10) tons. The rolling shall begin at the edge of the pavement and the roller shall move parallel with the center line of the roadway. The roller shall progress gradually towards the center of the roadway, uniformly lapping each proceeding track, covering the entire surface with the rear wheels and continuing until the stone does not creep or move ahead of the roller. After the crushed limestone has been thoroughly rolled and keyed, limestone screenings shall be applied gradually over the surface and the rolling continued until sufficient screenings have been applied to completely fill the interstices. The screenings shall be swept in with hand brooms to properly fill the voids. The spreading and rolling shall continue until no more screenings will go in dry. No excess of screenings shall be used before applying water. Immediately after the voids have been filled with screenings, the macadam shall be sprinkled until saturated, the sprinkler being followed by a roller. More screenings shall be added if necessary. The sprinkling, sweeping and rolling shall continue until a grout shall be formed of the screening and water that will fill all voids, and form a wave of grout before the wheels of the roller. The quantity of screening and water necessary to fill the voids shall be determined by the engineer and shall be sufficient to produce a rough, granular surface. The rolling, at all times, shall begin at the sides, and then progress toward the center, thoroughly covering the entire surface with the rear wheels. When compacted, this layer shall measure not less than five (5) inches in thickness.

Upon the finished waterbound macadam base there shall be uniformly applied by an approved type of spreader box, two (2) inch stone to a depth providing a total base course thickness of three (3) inches after final compaction. After shaping to grade and rolling with a ten (10) ton roller three quarter (¾) inch stone chips shall be broadcast and broomed into the surface voids at the rate of fifteen (15) pounds per square yard. Liquid asphalt at a temperature of 140 degrees F. shall be uniformly applied by a pressure distributor at a rate of one and one-half (1½) per gallons per square yard. Stone chips shall again be broadcast and broomed uniformly over the surface at the rate of fifteen (15) pounds per square yard. Liquid asphalt shall be uniformly applied by a pressure distributor at the rate of one-half (½) gallon per square yard. Stone chips shall be broadcast again at the rate of ten (10) pounds per square yard. The surface shall then be thoroughly rolled. The asphalt shall conform to the State Specification for Emulsified Asphalt R. S. 2, Page 640 of Illinois Standard Specifications for Road and Bridge Construction adopted January 2, 1952.

On the said foundation course shall be placed an asphaltic concrete surface course two (2) inches in thickness consisting of an asphaltic concrete mixture conforming to the standard requirements of the Illinois State Division of Highways for Type 1-11 Asphaltic Concrete adopted January 2, 1952, as follows: The asphaltic mix shall consist of a mineral aggregate bonded with the asphaltic cement. The mineral aggregate shall consist of the best quality of crushed gravel or crushed stone in sizes graduated in accordance with the following table, viz:

Asphaltic Concrete Surface Course, Fine Dense Graded Aggregate Type

Passing ½ inch sieve	95-100%
Passing ½ inch, retained on No. 4 sieve	45- 65%
Passing No. 4 retained on No. 10 sieve	10- 30%
Passing No. 10 retained on No. 40 sieve	5- 18%
Passing No. 40 retained on No. 50 sieve	7- 22%
Passing No. 80 retained on No. 200 sieve	5- 13%
Passing No. 200 sieve	4- 8%
Bitumen	5- 7%

(Table 45.11 p. 247 State Specifications)

The asphaltic cement shall conform with the standard requirements of the Illinois State Division of Highways for Grade P.A. 6 Paving Asphalt, adopted January 2, 1952. It shall have a flash point (Cleveland open cup) 500 plus Fahrenheit. It shall have penetration at seventy-seven (77) degrees Fahrenheit of seventy-five (75) to eighty-five (85), and at least ninety-nine and five-tenths (99.5) per cent of bitumen shall be soluble in carbon disulphide.

When fifty (50) grams of said paving asphalt is heated in an uncovered tin box five and one-half (5½) centimeters in diameter and three and one-half (3½) centimeters in depth, and is held at a temperature of three hundred and twenty-five (325) degrees Fahrenheit for five (5) hours, then it shall have lost not over two (2) per cent by weight and the penetration of the residue thus obtained shall not be less than seventy (70) per cent of the penetration before such heating, said penetration being determined as herein described. Said paving asphalt shall have a ductility of not less than one hundred (100) centimeters being determined by elongating a briquette Dow form of said paving asphalt at uniform rate of five (5) centimeters per minute at a temperature of seventy-seven (77) degrees Fahrenheit.

The paving asphalt and mineral aggregate shall be mixed when heated between three hundred (300) and three hundred fifty (350) degrees Fahrenheit in an approved mixer to produce a homogenous mixture in which all particles of aggregate are coated uniformly. The heated mixture shall be delivered to the pavement in trucks with approved clean tight dump bodies. The temperature when delivered at the street shall be between two hundred fifty (250) and three hundred fifty (350) degrees Fahrenheit. Upon arrival the asphaltic mixture shall be spread upon the prepared base at a uniform depth and consistency so that the thickness when compacted as herein described will be two (2) inches.

Immediately after the asphalt surface course shall be spread it shall be compacted thoroughly and uniformly with a three (3) wheel roller or a tandem roller. The asphalt paving mix shall be dumped first upon approved steel dump pans outside of the area on which it is to be spread. Immediately thereafter it shall be distributed into place with shovels and spread with rakes in layers of uniform density and correct depth, unless a spreading machine is used. If a spreading machine is used it shall be of a type approved by the Board of Local Improvements. Immediately after the surface course mixture is placed it shall be compacted thoroughly with a three-wheel roller or a tandem roller. One (1) or more three-wheel rollers and one (1) or more tandem rollers will be required. The actual number of such rollers to be determined by the Engineer in accordance with the progress of the work. If the production of the asphalt plant delivered to the pavement exceeds seventy-five (75) tons per hour additional rollers shall be furnished as directed by said Engineer. After a final rolling the asphalt surface course shall at all points have a density of not less than ninety-five (95) per cent of the maximum possible density of a voidless pavement composed of the same materials in like proportions.

IV-2 POZZOLANIC BASE COURSE.

On the subgrade as formed and compacted shall be placed and compacted to the depth shown on the plans and as herein provided.

(a) The pozzolanic base course shall be constructed in layers not more than six (6) inches (compacted) in thickness. When the thickness specified is more than six (6) inches the base course shall be constructed in two (2) or more approximately equal layers. Each layer shall be deposited, full-lane width, directly on the prepared subgrade or on the preceding layer of compacted mixture with a mechanical spreader box of a type approved by the Engineer. Where the base must be constructed in more than one layer, the previous layer shall be maintained in a moistened condition until the succeeding layer is placed. After having been tested for density and approved by the Engineer, the previous layer shall be raked to a depth of one (1) inch and dampened with water immediately prior to placing the succeeding layer so that the layers are in it together. The second layer must be placed the same way as the first layer. The Engineer of the Board of Local Improvements shall determine when the base course shall be constructed in one or more lifts. When placed, the pozzolanic mixture shall be free from segregation and shall require minimum blanding and manipulation. Immediately after placing the mixture shall be compacted with a pneumatic-tired roller, or with a vibratory compactor, or with a combination of the two. The base course, shall be given a final rolling with a three wheel or tandem roller. If the pozzolanic base is placed on gradual sub-base, the pozzolanic base shall be compacted to at least 100% of maximum density except that if more than one layer is required the first layer shall be compacted to 97% of maximum density and succeeding layers be compacted to 100% of maximum density.

(b) All pozzolanic mixture shall be placed and compacted the same day as it is mixed. The entire base course within the increment of work shall be completed within 24 hours.

(c) Except in specific cases, when otherwise permitted by the Engineer, the pozzolanic base course mixture shall be placed between April 15 and October 15 and only when the temperature is 40 or more.

(d) The three wheel or tandem rollers shall weigh from 6 to 10 tons and shall weigh not less than 200 pounds nor more than 325 pounds per inch width of roller. The compression developed by the pneumatic tired roller shall not be less than 225 pounds per inch of tire width.

IV-3 MATERIALS.

All materials shall conform to the following requirements:

(a) Lime. High Calcium hydrated lime or monohydrated dolomitic lime shall be used. The lime shall have a total oxide (calcium and magnesium) equivalent to not less than 85% and a loss of ignition of not more than 25%. Monohydrated dolomitic lime shall have only the calcium component hydrated. Exposure of the lime to air shall be held to a minimum. If more than 10% of the lime has reverted to a carbonate, it shall not be used.

(b) Fly Ash. The pozzolan, prior to dampening thereof to alleviate the dust problem shall comply with the requirements of AST Designation: C-379 or C-432 with 10% maximum loss on ignition. The tests prescribed by this specification shall be performed at the option of the Engineer. At the time of mixing the pozzolan shall be in a finely divided condition such that 95% shall pass a ½ inch sieve when dry-sieved.

(c) Coarse Aggregate. The coarse aggregate shall be gravel, crushed stone, crushed slag or boiler slag meeting the following requirements:

(1) Gravel, crushed stone or crushed slag. The gradation for all three materials, shall be as follows:

No. 200 (gravel)	0- 10%
(crushed stone & slag)	0- 15%

(2) Boiler slag. The slag shall be wet bottom boiler slag produced as a by-product of a power plant burning pulverized bituminous coal. The slag shall be composed of hard durable particles and shall be free of excessive or harmful amounts or foreign substances. Boiler slag or granulated slag in an oven dry condition shall meet the following gradation requirements:

Sieve	*Per Cent by Weight Passing*
No. 4	80-100%

Note: Granulated slag will be permitted only when authorized in writing by the Engineer.

(d) Samples. The contractor, shall at his own expense, submit to the Engineer a minimum of 25 pounds of lime, 100 pounds of fly ash and 150 pounds of the course aggregate which he proposed for use in the pozzolanic mixture. The lime, when sampled, shall immediately be placed in a sealed container and shall be kept sealed. Samples shall be furnished at least 45 days prior to the construction of the pozzolanic base course. The samples submitted will be tested for acceptance of materials and also to determine whether or not they will produce a satisfactory mixture; and will be used to determine preliminary proportions for the mixture composition.

IV-4 Composition of Mixture.

(a) The lime, pozzolan and aggregate shall be proportioned within the following limits on a dry-weight basis:

Percent by Weight of Total Dry Mixture

Ingredient	*Gravel, Crushed Stone Crushed Slag or Aggregate Blend*	*Boiler Slag*
Lime	2 - 5	2 - 4
Pozzolan	8 - 16	15 - 30
Aggregate	79 - 90	56 - 78

(b) The actual proportions of lime, pozzolan, water and aggregate will be set by the Engineer before work begins and will be based on tests conducted on mixtures composed of samples of the constituent materials furnished by the Contractor. The right is reserved by the Engineer to make such changes in proportions during the progress of the work as he may consider necessary.

(c) The composition of the mixture shall be such that when molded into cylinders, cured and tested as stated in the following paragraph, each cylinder shall have a minimum compressive strength of 450 psi and a maximum weight loss of 14% after 12 cycles of freezing and thawing.

(d) Test cylinders shall be molded at the optimum moisture content and maximum density in accordance with AASHO Designation T-180, Method C, except that the 5 lift requirement is replaced with 3 lifts and no replacement of coarse aggregate (¾ inch sieve) is made. The molded specimens shall immediately be placed in an oven with forced air circulation for 7 days at 100-3 F. At the end of 7 days, the test cylinders for compressive strength testing shall be removed from the containers, allowed to cool to room temperature, soaked for four hours capped and broken for compressive strength within one hour of time of removal from water. The specimens to be tested for freeze-thaw resistance shall be cured in the same manner as the strength specimens without the 4 hour soaking period. After curing the specimens shall be subjected to 12 cycles of freezing and thawing in accordance with AASHO Designation D-560, Sections 5, 9 and 10 pertaining to specimen No. 2 (weight loss specimen).

(b) The equipment used must be provided by means, meeting with approval of the Engineer, for calibration and check tests of measuring devices. In all plants, the water shall be proportioned by weight or volume and there shall be means by which the Engineer may readily verify the amount of water per batch or the rate of flow for continuous mixing. The contractor shall provide a platform scale and make arrangements for the use of a certified truck scale of sufficient capacity for calibration and periodic check tests of the feeders or measuring devices as needed during production.

(c) The mixer shall be capable of producing a uniform mixture. Mixing operations shall be continued until all ingredients are distributed evenly throughout the mixture and a uniform mixture, free of segregation, is obtained. The engineer shall be the sole judge of the adequacy of mixing. The mixer shall be capable of discharging the mixture without undue segregation. The moisture content at the time of mixing shall be such that the moisture content at the time of compaction will be within 85 to 110 percent of the optimum moisture determined.

IV-6 Prime Coat.

On the prepared base after removing, by sweeping or otherwise, any loose material, dirt or debris, shall be applied a prime coat of bituminous material at the rate of 0.15 to 0.30 gallons per square yard, using asphalt: MC - O.

Prime Coat for the above and its application shall conform to the following:

(a) This material shall be homogenous and shall show no separation of asphalt after thorough mixing, within 30 days after delivery, provided separation has not been caused by freezing. It shall coat the aggregate being used in the work to the satisfaction of the engineer and shall conform to the following requirements:

Flash Point (Tag open cup) °F.	100 plus
Viscosity, Saybolt Furolat 77°., Sec.	75-150

Penetration at 77° F. 100g 5, Sec.	150-300
Ductility at 77° cm (when penetration at 77° is between 150-200	100 plus
Ductility at 60° F. cm (when penetration at 77° is between 200-300	100 plus
Bitumen soluble is carbon disulphide, percent	99.5 plus

(b) The pressure distributor used for applying the liquid shall meet the following requirements:

It shall operate smoothly at low speed.

It shall have a dial and pressure gauge, spray bars of various lengths, and a hand spray bar for applying materials at street and alley returns and radius corners.

(c) A tank thermometer to determine the temperature of the contents of the tank and a tachometer to enable the driver to maintain the constant speed necessary for the correct application of the specified quantity of bitumen. The cost of this material, together with the cost of labor, equipment and other costs required in placing such materials shall be included in the unit price bid per square yard of pavement.

Upon the primed pozzolanic base course shall be placed 2 courses of asphaltic concrete and shall meet the same requirements as previously stated.

(d) The bituminous materials used in the mixture shall be asphalt cements of 85-100, 100-120, or 120-150 Penetration grade. The same grade of bituminous material shall be used throughout the work. The Engineer reserves the right to specify the grade to be used. The percentage of residual bitumen shall be 3 to 6 %. The Engineer may make such changes in proportions during the progress of the work as he may consider necessary.

(e) *Samples and Tests.*

A ½ gallon sample of the bituminous aggregate mixture for each 5,000 tons produced, shall be taken by the Engineer for extraction tests. A minimum of three samples shall be submitted. The sample shall be a composite sample taken from at least 5 trucks. A one-quart sample of the bituminous material being used shall be taken by the Engineer at the same time the bituminous aggregate mixture sample is taken. The sample shall be taken from the line leading to the asphalt bucket or pug mill spray bar or directly from the asphalt bucket or spray bar. Paving asphalt shall be submitted in a one-quart friction top can.

(f) *Mixture Composition and Control Factors.*

The Contractor, at his expense, shall submit a sample of 100 pounds of the aggregate to the Engineer which he proposes to use in the bituminous mixture. The sample shall be submitted at least three weeks prior to start of base construction. The aggregate sample shall be taken under the supervision of the Engineer.

At the time of submitting the sample, the Contractor shall state the source of the aggregate and the source and grade of the asphalt that he will use. The sample submitted to the Engineer when mixed with the designated grade of asphalt shall produce a satisfactory bituminous mixture that will have a strength of at least 100 pounds greater than the minimum requirements shown on the plans. If the material will not produce a satisfactory mixture meeting this requirement, the Contractor shall submit a material that will comply. If the aggregate furnished for design purposes contains some crushed material, the Contractor shall submit with the sample a statement giving the percentage of plus No. 4 material that is crushed. Throughout the improvement this percentage shall be maintained within a minus 5 percentage points of this amount.

(g) The mix to be used shall be prepared as required by the appropriate state specification.

(h) The Engineer may order any tests that he may deem necessary to insure the quality of the work.

VI-III *Construction Procedure:*

(a) Transportation of Bituminous mixes shall be governed by Article 46.14 of the Standard State Specifications.

(b) The subgrade shall be prepared as required in Section II of these specifications. The Contractor shall notify the Board of Local Improvements a sufficient time before laying the base course to allow for an inspection of the subgrade. The base course shall not be placed except in the presence of the Engineer or his representative.

(c) The base course shall be spread by an approved type asphalt spreading and finishing machine. The machine shall meet the requirements of Article 133.3 and its addendums of the State Specifications, or it may be a type approved by the Engineer.

(d) The base course shall be constructed only when the temperature in the shade is at least 40 degrees F. In specific cases, the Engineer may order a waiver of this limitation.

(e) The base course mix shall be delivered at a temperature of 225 degrees to 325 degrees F.

(f) The base course may be constructed in one or more courses, the decision shall be made by the Engineer for each project.

(g) The base course shall be compacted with three wheel rollers or tandem rollers weighing from 6 to 12 tons and shall not weigh less than 200 pounds nor more than 400 pounds per inch of width of roller. Vibrating rollers will be permitted if approved by the Engineer.

(h) The first layer of the bituminous mixture shall be compacted to a density of not less than 90% of the theoretical density. Succeeding layers or where one layer is used shall be compacted to a density of not less than 90%. The theoretical density shall be computed from the saturated surface dry specific gravity of the aggregate, and the specific gravity of the asphalt at 77 degrees F., or it may be determined by the high pressure air

meter. The density of each of the finished layers of bituminous mixes shall be obtained from specimens furnished by the Contractor. Specimens shall be cut by the Contractor from the finished layer with a core drill. The diameter of a specimen shall in no case be less than 3⅞ inches nor more than 4 inches. Four specimens shall be taken for each day's run for each layer. When directed by the Engineer, additional specimens shall be taken, but the total number from one day's run shall not exceed 20. The Contractor shall remove the specimens at locations designated by and in the presence of the Engineer and transport them to a location designated by the Engineer. Extreme care shall be taken to avoid damage to the specimens. The holes caused by the removal of the specimens shall be refilled immediately with bituminous aggregate mixture meeting these specifications, compacted and finished to the satisfaction of the Engineer. The cost of the work required in taking and transporting the specimens and in refilling the holes caused by removal of the specimens shall not be paid for separately, but shall be included in the unit price bid per square yard for pavement.

(i) The stability of the completed base course shall not be less than 900 pounds as required by the State of Illinois.

(j) *Tolerance in Thickness:* It is the intent that the base course shall be constructed to the nominal thickness shown on the plans. Thickness determinations shall be made at such points as the Engineer may select. If thicknesses less than 95% of nominal thickness are encountered, the extent and depth of the deficient area shall be determined and Bituminous Mixture Base Course or Bituminous Concrete Surface Course shall be placed by the Contractor at his expense to bring the deficient area of the base to nominal thickness. If Bituminous Concrete Surface Course is used, it may be placed as part of the surfacing operation.

(k) On the finished base course shall be laid a bituminous concrete course of 1½ inches in thickness, the surface course shall be constructed in accordance with the requirements of Section IV-12 through IV-9 of these Specifications.

P.C.C. Sidewalk removal and replacement where necessary. Concrete crosswalks shall be built according to the Standard City Code of the City of Chicago.

The Concrete shall conform to Class X Concrete (as described in this ordinance for curbs and gutters).

All existing catchbasins which are to be abandoned are located at the intersections of said streets. Where existing catchbasins are to be abandoned, the outlet pipe connection from the catchbasin to the sewer shall be plugged and properly sealed and the corbel courses broken down and the catchbasin cleaned and filled with suitable material.

Pavement removal and restoration where necessary.

Additional masonry where necessary.

Said work is to be done in a workmanlike manner under the superintendence of the Board of Local Improvements of the said City of Chicago.

Section 2. Section 4. That the aggregate amount herein ordered to be assessed against the property, and also the assessment on each lot and parcel of land therein assessed shall be divided into five (5) installments in the manner provided by the statute in such cases made and provided, and each of said installments shall bear interest at the rate of seven (7) per centum per annum according to law until paid, or as otherwise provided by law.

The Committee on Aviation submitted the following report:

CHICAGO, June 26, 1973.

To the President and Members of the City Council:

Your Committee on Aviation, having had under consideration a resolution introduced by Aldermen Kelley, Wigoda and Cohen (referred to Your Committee on May 9, 1973) begs leave to recommend that Your Honorable Body memorialize the President of the United States, the Federal Aviation Agency and the State Department, and adopt the resolution transmitted herewith.

This recommendation was concurred in by 8 members of the committee, with no dissenting vote.

Respectfully submitted,

(Signed) CASIMIR C. LASKOWSKI,
Chairman.

On motion of Alderman Laskowski the said substitute proposed resolution transmitted with the foregoing committee report was *Adopted,* by yeas and nays as follows:

Yeas—Aldermen Roti, Barnett, Kenner, Despres, Sawyer, Wilinski, Cousins, Adduci, Vrdolyak, Bilandic, Kwak, Burke, Lawlor, Langford, Shannon, Hines, Fitzpatrick, Kelley, Stewart, Stemberk, Potempa, Rhodes, Marzullo, Zydlo, Washington, Cross, Filippini, Keane, Gabinski, Sande, Frost, Laskowski, Aiello, Casey, Laurino, Simon, Pucinski, Natarus, Singer, Fifielski, Cohen, Hoellen, Hedlund, Wigoda, Stone—45.

Nays—None.

The following is said substitute resolution as adopted:

WHEREAS, The Civil Aernonautics Board of the United States has denied the application of El Al Airlines for an approved direct flight route from Chicago to Israel; and

WHEREAS, Thousands of residents of Chicago and the Midwest fly to Israel each year for business, for pleasure, for general tourism, to visit relatives, or to make a pilgrimage to the religious shrines so significant to the Jewish and Christian faiths; and

WHEREAS, Existing air travel patterns necessitate for travelers departing Chicago a change of aircraft at either Kennedy International Airport or Montreal with all the hardship, inconvenience and expense caused thereby; such stopovers being especially burdensome on the many elderly air passengers; and

WHEREAS, Substantial congestion of air traffic already exists over Kennedy Airport and with all the hazards inherent in such conditions, and delays in both landing and departing a direct Chicago-Israel route would by-pass this congestion; and

WHEREAS, The denial of a direct flight from Chicago to Israel deprives Chicago and its surrounding communities of many economic benefits which are an important factor in the growth and development of Chicago and the State of Illinois; and

WHEREAS, The Civil Aeronautics Board and the City of Chicago have approved ten other international airlines to fly from O'Hare International Airport directly to numerous international destinations, especially in Mediterranean countries, and denial of El Al's application therefor appears unjustified; now, therefore,

Be It Resolved, That the members of the City Council of the City of Chicago hereby memorialize the President of the United States, the State Department and the Federal Aviation Agency to take immediate and favorable action on El Al's application and to inquire into the reasons for the decision of the Civil Aeronautics Board denying El Al's application for landing rights in Chicago; and to grant to Israel's El Al Airlines due and proper landing rights at Chicago-O'Hare International Airport; and

Be It Further Resolved, That a suitable copy of this resolution be forwarded by the City Clerk of the City of Chicago to the President of the United States, the Secretary of State, to the United States Senators from the State of Illinois, the Speaker of the House of Representatives of the United States, each member of the Congress of the United States from the State of Illinois, and to the Chairman of the Civil Aeronautics Board.
